

DECA DELIVERS AT CC&TC

WHAT IS DECA?

DECA (Distributive Education Clubs of America) is an organization that prepares emerging leaders and entrepreneurs for careers in marketing, finance, hospitality, management in high schools and colleges around the globe.

The DECA chapter located at Caddo Career & Technology is working very hard to prepare those future leaders, and those efforts have not gone without notice at the national level.

Dimensions Magazine, a DECA publication with over 200,000 readers across fifty states and Canada will feature Caddo Career & Technology Center's volunteer work with The Pet Education Project at the Red River Revel. The Pet Education Project is an education and outreach program that visits schools to teach the importance of responsible pet ownership and other topics regarding animal and environmental awareness. CC&TC's DECA chapter will also be recognized in Louisiana as a Summit Level DECA Week Achiever. The state advisor will present a plaque from National DECA at the Louisiana DECA Career Development Conference held in Baton Rouge Feb. 26th. The school will be featured on the DECA website after January. We encourage everyone to take a look at DECA and other world class, nationally acclaimed programs that are available to our students here in Caddo Parish. Way to go, CC&TC!!!
